Summary

Passionate and results-driven Computer Science undergraduate at Majmaah University hands-on experience in full-stack web development. Skilled in TypeScript, React, Node.js, and modern cloud platforms like AWS and GCP. Proven ability to build responsive, user-focused applications through personal and collaborative projects. Strong foundation in software engineering principles, system design, and API development. Actively seeking a junior developer or internship position to contribute to innovative teams, grow technical expertise, and solve real-world challenges using clean, scalable code.

Education

Majmaah University

2024– Present

Computer Science

Bachelor's Degree (Undergraduate)

Currently pursuing a Bachelor's degree with a focus on software development, algorithms, and system design. Gained hands-on experience with TypeScript and full-stack web development.

Projects

Personal Portfolio Website

- Created a portfolio site with SolidJS and TypeScript to showcase projects and resume.
- Hosted and maintained the site via Vercel

University Hackathon Project

- Collaborated in a team to develop an app improving student campus experience.
- Contributed to frontend design and backend integration.
